

Orion Project

02/02/2023

CEO: Osvaldo J. Rincon

CO FOUNDER: John S. Materan

Overview

Humanity, nature and outer space in artificial intelligence, in a future cryptographic currency of interplanetary payment.

Specific objectives

- 1. Make human beings understand how important a robot relationship is, interplanetary space and diversity with nature three aspects in a single AI.*
- 2. Integrate through information media the different functionalities of AI.*
- 3. Manage to motivate the human being to obtain a broader learning about how wonderful it is to understand the relationship that exists between our brain and AI.*
- 4. Making cryptography more closely linked to artificial intelligence in this way orion project could be used in the future as means of terrestrial and interplanetary payments traveling to infinity and beyond.*
- 5. Define business strategies in collaboration with potential investors, managing to maintain supply and demand for the Orion project.*

Table of Contents

- *Introduction.*

Abstract

Orion Project is a cryptographic methodology developed to create a wide knowledge of AI, robot and interplanetary space, thus achieving income to satisfy our investors. ORION PROJECT is fully decentralized and will be used for terrestrial and interplanetary payments.

INTRODUCTION

Artificial Intelligence (AI) in simple words is a computer science to create machines as intelligent and capable as humans with the help of algorithms designed to make decisions using real-time data in turn can be integrated into space exploration by connecting to the human being and the cryptography, thus making the Orion Project an effective method in terrestrial and interplanetary payments. Orion will achieve the integration of humans, robots, nature and outer space.

• Orion Project Token (Orion)

ORION PROJECT was created on the Binance Smart Chain. This token can go viral in the market of cryptocurrencies on the decentralized PancakeSwap Exchanges, with the intention of bringing it to more centralized and decentralized exchanges. ORION PROJECT will be the only token that will unite AI, robots, nature and outer space in a single method to follow for the terraforming of new worlds, thereby achieving the use of the ORION PROJECT token as a terrestrial and interplanetary payment method.

•How will Orion project be used in the future?

As soon as sufficient liquidity is obtained, the supply and demand of ORION PROJECT will be so great that the main chains will use orion as terrestrial and interplanetary payment currencies with this method our investors will be satisfied.

• Orion Project(ORION) Tokenomics

Tokenomics 10.000.000,00
